

- The Vision

What If Every Town Had Its Own Digital Marketplace?

We're building a network of AI-powered, trust-verified local business hubs — starting in Kenya, designed for every town in Africa. One platform to discover, trust, and support local businesses.

7.9M SMEs need visibility

90% have zero online presence

290+ towns underserved

THE PROBLEM

The Local Commerce Crisis

While major cities get all the tech attention, 290+ Kenyan towns are left behind. Local businesses are invisible, customers are getting scammed, and money leaves communities.

"I lost KES 15,000 to a Facebook seller in Thika. I later found out there was a verified shop selling the same item 200 meters from my house."

— Real customer feedback, Thika focus group 2025

Invisible Businesses

90% of local SMEs have no online presence. Customers can't find them without physically walking the streets.

7.1M unseen

Rampant Scam Epidemic

Online shoppers get scammed daily by fake listings. Trust in digital commerce is collapsing in smaller towns.

68% fear fraud

Unaffordable Marketing

Billboards cost KES 200K+/month. Radio is KES 50K+. Small legitimate shops can't compete with loud, well-funded scammers.

KES 0 budget

Broken Discovery

Customers buy from far away because they don't know a legit shop is just 500 meters away. Local money leaves communities.

70% leave town

Zero Customer Data

Businesses operate blindly. No idea what customers search for, what competitors charge, or when demand peaks.

0 insights

No Trust Infrastructure

No verification system exists. Customers can't distinguish legitimate businesses from fly-by-night operations.

0 verified

The painful reality

93% of Kenyans access the internet via mobile — yet local shops remain invisible online.

THE SOLUTION

BizHub: The Trust Layer for Local Commerce

A hyperlocal digital ecosystem for every town — powered by AI, built on physical verification, designed to make local businesses discoverable, trustworthy, and thriving.

One App. Every Town. Total Trust.

BizHub is more than a directory. It's a complete digital ecosystem that physically verifies businesses, powers AI-driven search, enables flash deals, tracks visits, and drives daily engagement — creating a self-reinforcing trust economy.

AI-POWERED

VERIFIED

HYPERLOCAL

PWA + WEB

Hyperlocal Focus

Town-specific content. Thika users see Thika businesses, deals, and events. Each town — its own hub.

Physical Verification

We visit and verify every business. "Verified Badge" = 100% real shop. Zero scams.

AI Search Engine

Natural language: "Best plumber open now?" GPT-4 analyzes all businesses and responds instantly.

Proof of Visit

Customers share selfies/receipts. Creates authentic social proof + referral tracking.

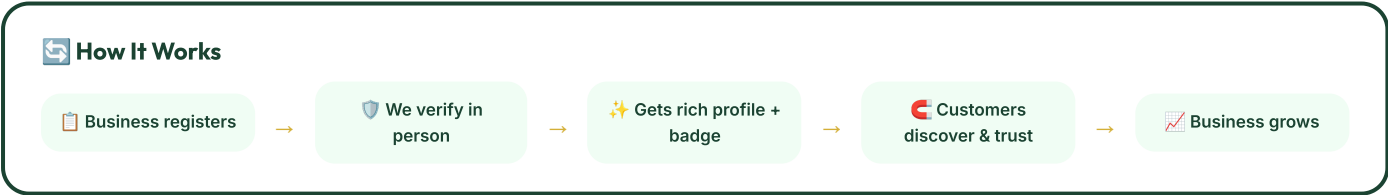

Flash Deals Engine

"Happy Hour" for retail. Time-limited offers with urgency counters drive instant foot traffic.

Merchant Analytics

"Google Analytics" for shops. Views, clicks, customer origins — data never available before.

AI & INTELLIGENCE

Built-In Artificial Intelligence

Not planned. Already built and deployed. Our AI features set us apart from every competitor on the continent.

🧠 "Ask BizHub" — Conversational AI Search

Customers type natural questions like "Best restaurant open right now?" — and our GPT-4o-mini powered engine instantly searches all verified businesses, ranks them by rating, and presents personalized answers with direct links.

Status: Live in production. OpenAI API integrated. Context-aware with 50+ business profiles per query.

TRUST & VERIFICATION

The Trust Engine That Powers Everything

Trust is our moat. Every feature reinforces trust. Every interaction creates more social proof. This is our network effect.

100% Verified. Zero Scams. Total Confidence.

We physically visit and verify every business on the platform. Our "Verified Badge" is a guarantee: if it's on BizHub, it's real. This eliminates the #1 barrier to local digital commerce — fear of fraud.

Proof of Visit
Photo verification with referral tracking & share links

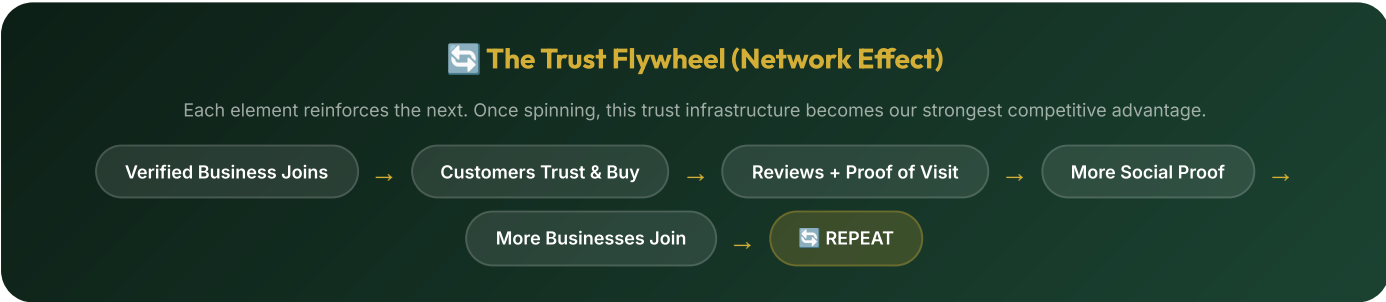

Reviews & Ratings
Star ratings, photo reviews, AI-generated summaries

Social Proof
View counters, trending badges, community wall

Report System
Community policing with flag/report mechanism

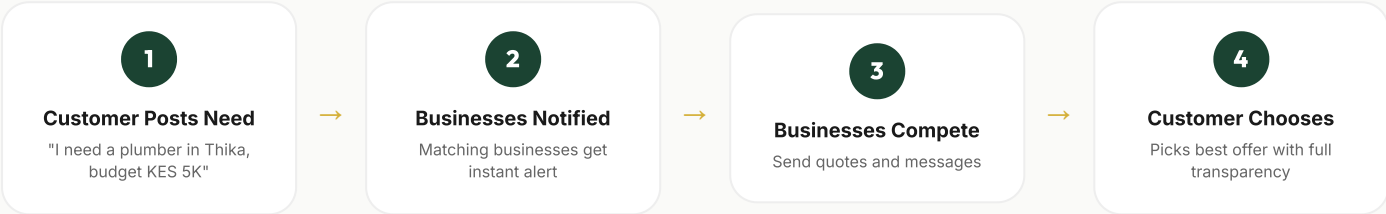

INNOVATION

The Reverse Marketplace & Growth Features

Three proprietary innovations that no competitor has: Smart Leads (reverse marketplace), Local Partnerships, and Micro-Influencer tracking.

💡 Smart Leads — "Reverse Market"

Instead of customers searching for businesses, customers **broadcast their needs** and businesses compete to respond. This flips the marketplace and creates high-intent leads.

Local Partnerships

Businesses form cross-promotional partnerships. A restaurant partners with event venues. A salon partners with a spa. BizHub facilitates these connections, creating a business network effect.

Micro-Influencer Tracking

Every Proof of Visit post generates a unique share link. When that link drives views, the poster earns "impact" points. Gamified word-of-mouth turns every customer into a micro-promoter.

Live Pulse (Flash Deals)

Time-limited deals with urgency counters. Businesses clear stock, drive foot traffic during slow hours. Animated "LIVE PULSE" badges create FOMO and drive instant action.

Community Events Hub

Central calendar for everything happening in town — from church fundraisers to club nights. Event cards with date, time, location, pricing, and attendee counts.

THE PRODUCT

20+ Features. All Built. All Deployed.

This is not a pitch for a product that doesn't exist. Every feature below is live, tested, and running in production.

Smart Directory
Rich profiles with photos, hours, GPS, WhatsApp

AI Search
GPT-4 powered conversational business discovery

AI Reviews
Auto-generated review summaries & sentiment tags

Recommendations
Personalized "For You" business suggestions

Smart Alerts
Email notifications for matching new businesses

Flash Deals
Time-limited offers with live countdown

Events Hub
Community calendar with RSVP & filtering

Proof of Visit
Photo verification with share & referral links

Smart Leads
Reverse marketplace — customers broadcast needs

Partnerships
Cross-promotion between local businesses

Analytics
Views, clicks, customer data for merchants

Compare Tool
Side-by-side business comparison

Interactive Map
Leaflet-powered GPS map with pins

Reviews System
Star ratings, photo reviews, owner responses

Favorites
Save and manage bookmarked businesses

Notifications
Real-time notification bell & system

Invite System
User, business, and admin invites

Admin Panel
Complete management dashboard

PWA Ready
Installable mobile app experience

WhatsApp Chat
One-click direct messaging

Built for Scale. Multi-Tenant Architecture.

Single codebase. We spin up a new town ("NakuruBizHub") in clicks, not months.

THE VISION

One Town at a Time. All of Africa.

BizHub's town-by-town strategy creates local dominance before expanding. Starting with Kenya's 290+ towns, with a clear path to becoming the infrastructure for local commerce across the continent.

OUR MISSION

"To make every legitimate local business in Africa discoverable, trusted, and thriving."

We start hyperlocal. We dominate each town. We connect the network. Every new town makes every existing town more valuable.

+ 280 Towns

Phase 1: Kenya
290+ towns. 7.9M SMEs. Prove the model town by town. Capital-efficient growth.

Phase 2: East Africa
Tanzania, Uganda, Rwanda. Similar market dynamics. Same playbook, adapted locally.

Phase 3: Pan-Africa
Nigeria, Ghana, South Africa. \$4.1T consumer market by 2030 (McKinsey). BizHub is the infrastructure.
